

Tramway Alliance to carry out water pipeline alterations at the Insinöörinkatu

Due to work on water supply network connections, we are forced **to interrupt the water supply during the night of March 7.-8.2018 (Wednesday - Thursday) from 10 pm to 6 am in this building.**

The interruption to the water supply may continue for longer than announced if unexpected problems are encountered in the connection work.

We recommend that you store some water in a container before the interruption begins. During the interruption, all water taps must be kept closed to avoid any water damage. You can test if the water pressure has returned to normal by running the tap slightly open for a short while.

After the work is completed, the water may temporarily appear cloudy. The water will become clearer after it has been run for a while.

We apologies for any inconvenience caused by the interruption to the water supply.
